KAVA | NATURAL FLAVORS | NON-ALCOHOLIC | 18+ ONLY

YOU ARE NOW ON

ISLAND TIME

Kavalý is more than a beverage—it's your passport to creating unforgettable moments. Each sip transports you to a world set on island time, where the pace is slower, the air is warmer, and every moment feels a little more special. Kavalý sets the tone for connection and relaxation. Rooted in tradition and inspired by the vibrant spirit of the tropics, Kavalý is the perfect companion for turning everyday gatherings into cherished memories.

FAQs & DEFINITIONS

DEFINITIONS

KRATOM

Kratom is a plant native to Southeast Asia, scientifically known as *Mitragyna speciosa*. The leaves of the kratom tree contain alkaloids that can have a variety of effects depending on: dosage, MIT ratio, and delivery system.

MITRAGYNINE

Mitragynine is the primary active alkaloid found in the leaves of the kratom plant (*Mitragyna speciosa*). It is responsible for many of kratom's effects, including its stimulating and analgesic properties.

ALKALOID

An alkaloid is a naturally occurring chemical compound, typically found in plants, that contains nitrogen and has a wide range of effects on the human body.

KAVA

Kava is a plant native to the South Pacific, scientifically known as *Piper methysticum*. Its roots are traditionally used to make a beverage that has calming and relaxing effects.

KAVALACTONES

Kavalactones are the active compounds found in the root of the kava plant (*Piper methysticum*). Kavalactones work by interacting with neurotransmitter systems in the brain, including GABA (gamma-aminobutyric acid) receptors, which help to reduce anxiety, promote relaxation, and improve sleep.

100% satisfaction or money back guaranteed. Returns can be swapped for other products equal in value or cash back.

SHIPPING

Standard shipping is UPS Ground. Contact your sales rep for expedited shipping options.

UNDERSTANDING MIT IN TERMS OF PURITY

Kratom extract products have a concentrated percentage of the Mitragynine alkaloid compared to Kratom leaf powder. For instance, Zion Herbal's Silver Series products have a 10% MIT content along with a number of sub-alkaloids in lesser quantities. This is considered a full-spectrum product.

In the Lucky 90 product line, the MIT content is 90%, while the other sub-alkaloids are found in trace amounts. Generally, the higher the MIT percentage, the more energizing the product.

Extract products with a lower MIT content retain more of the other alkaloids and lipids found in the Kratom leaf and may offer a more balanced experience.
